

Keeping citizens informed.

Hurricane Season is here!

Are you signed up for our emergency notification system, CodeRED?

The CodeRED system gives city officials the ability to deliver pre-recorded emergency telephone notification/information messages to targeted areas in the event of a hurricane or any other kind of community crisis where rapid and accurate notification is essential for life safety.

Here is just one example:

"During Hurricane Isaac, local government officials were notified that Waste Management would not perform their garbage and recycling pick-up due to the landfill being closed. That wouldn't seem like such a big deal except that we were expecting sustained tropical storm and hurricane force winds on our barrier island. Garbage cans, recycling bins and bagged garbage could have become airborne and cause damage to homes, windows and property.

We launched a CodeRED message that afternoon to notify residents that there was NO garbage service and to secure garbage cans and recycling bins INDOORS. Folks received the message and complied."

- **Susan Phillips**, Assistant to Town Manager/Emergency Management PIO
Longboat Key, Florida

To register for the CodeRED system simply log onto: www.Deerfield-Beach.com/CodeRED and fill out the online form.
